RICOH
imagine. change.

Designed with ease of use in mind. Your capture software shouldn't be a source of stress or a heavy IT lift.
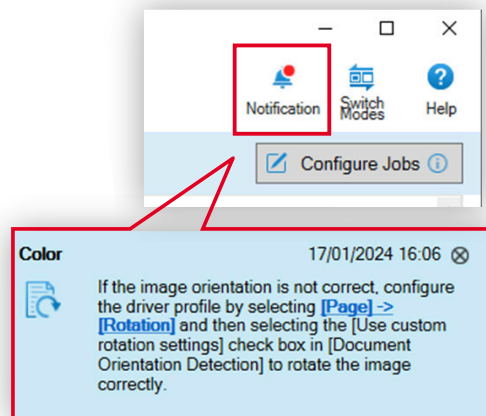

Easy Setup

Getting started is simple. Let Easy Setup guide you through the most common tasks or step into advanced settings as an admin or experienced user. Helpful for easy onboarding and employee adoption.

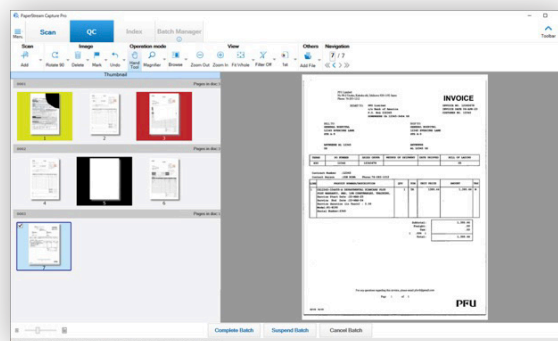

Setting Assistant

You don't have to be an IT expert to get great results with PaperStream Capture Pro. Setting Assistant recommends adjustments to optimize your workflow. Enjoy digital guidance to enable page rotation and blank page removal. Helpful to catch overlooked blank pages and improperly oriented documents.

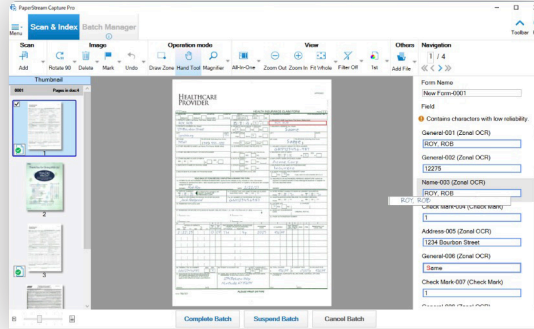

Image Check

Image Check is like having an extra set of eyes. PaperStream Capture Pro uses color-coded notifications to alert operators to address potential issues, like paper damage or image noise, before the next step in the document workflow. Helpful to avoid business process interruption.

Optimized for streamlined workflows. Automate form processing, redact sensitive information, and make your archives actionable.
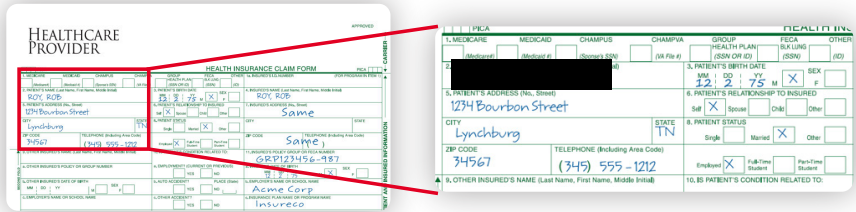

Automated Forms Processing

Simplify and shorten manual data-entry tasks for form processing. Automate data collection for up to 100 fields per form, process multiple types in the same batch, and gain expanded recognition technology with hand-print recognition (AI-OCR). Helpful to improve form-intensive workflows.

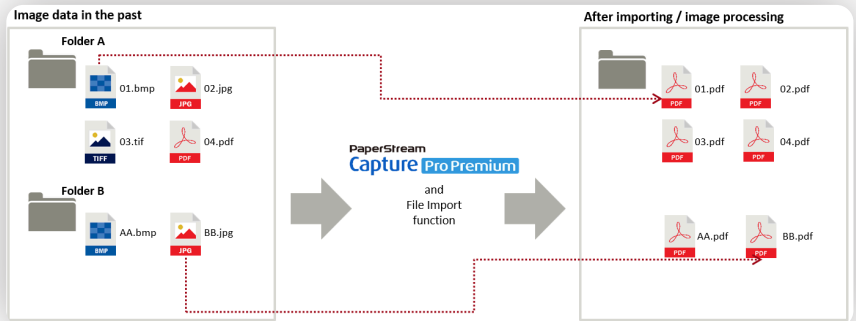

Redaction Function

Protect personally sensitive information by redacting it. The Redaction Function is meant to prevent the unauthorized visibility of the data in selected fields in subsequent workflow steps. Helpful for forms that collect personal information, such as applications and invoices.

File Import

Make your existing digital files work for you. Import image-based scanned documents directly into your capture workflow to extract valuable data and improve searchability. (BMP, PNG, PDF, JPEG, TIFF file types) Helpful for companies to access untapped archived information.
